

iMac Intel 21.5" Retina 4K Display Hard Drive Assembly Replacement

Prerequisite for removing the hard drive assembly in a 21.5" Retina 4K Late 2015 iMac EMC 2833.

Written By: Evan Noronha

INTRODUCTION

Prerequisite only guide for removing the hard drive assembly from a 21.5" Retina 4K Late 2015 iMac.

TOOLS:

- [Spudger](#) (1)
-

Step 1 — Hard Drive Assembly

- Lift the hard drive from the edge nearest the logic board and pull it slightly out of its recess.

 The hard drive is still attached by its SATA cable; do not attempt to fully remove it from the iMac yet.

Step 2

- Use a spudger to disconnect the single SATA cable by prying it gently away from the hard drive.
- Remove the hard drive assembly from the iMac.

To reassemble your device, follow these instructions in reverse order.
